

CPC manual-label example: Piers 35 and 36

Use [C 920019 PSM \(1992\)](#) as the shared reference. The useful review narrative is on printed pages 16–24. This report records CB, BP, councilmember, business, and resident opposition followed by a materially revised application.

Binary fields use 1, 0, or unclear.

Actor-position fields use `none_or_procedural`, `support_or_request`, `opposition`, or `unclear`. Code only what the report documents; do not infer a causal response from timing alone.

Section	Label	Code	Evidence
Process	<code>local_opposition</code>	1	CB3 unanimously recommended disapproval (p. 16); 15 speakers opposed at CPC, including elected officials, businesses, and residents (pp. 17–19).
Process	<code>local_request_condition</code>	1	Local actors sought rejection, alternatives, reduced vehicle concentration, and waterfront access (pp. 17–19).
Process	<code>revision_or_concession</code>	1	The amendment removed multi-agency fueling, reduced uses and vehicles, added an esplanade, and imposed a seven-year limit (pp. 1, 5–6, 23–24).
Process	<code>procedural_response</code>	0	The response did not include a study, task force, monitoring, reporting, outreach, or future consultation.
Process	<code>explicit_local_response</code>	1	The report names BP, legislators, Council members, and the local community, then says DGS changed the proposal "in response to these concerns" (pp. 23–24).
Process	<code>approved_unresolved_objection</code>	0	CPC describes a revised proposal; it does not expressly reject or defer a specific remaining local demand in its decision.
Actors	<code>cb_request_or_opposition</code>	1	CB3 recommended disapproval 35–0 and sought alternatives and changes (p. 16).
Actors	<code>bp_request_or_opposition</code>	1	The BP recommended disapproval and testified in opposition (p. 17).
Actors	<code>councilmember_position</code>	<code>opposition</code>	The report explicitly lists council members from the 1st and 2nd Districts among opposition speakers (pp. 17, 19).
Actors	<code>civic_group_position</code>	<code>opposition</code>	Named business and community organizations appear in the opposition testimony (pp. 17–19).
Issues	<code>affordability_displacement</code>	0	References to a low-income neighborhood do not by themselves make affordability or displacement a review issue.
Issues	<code>traffic_parking</code>	1	Opponents focused on vehicle concentration, parking, fueling, and traffic effects (pp. 17–19, 23–24).
Issues	<code>scale_character_preservation</code>	1	The facility's size and compatibility with the surrounding residential community were substantive objections (pp. 17–19).
Issues	<code>infrastructure_services</code>	1	The dispute concerned the siting and scale of sanitation, health, and municipal vehicle facilities (pp. 16–24).
Issues	<code>environment_open_space</code>	1	Waterfront use, environmental effects, and public esplanade access were central issues (pp. 17–24).

Evidence summary example. "CB3, the BP, councilmembers, businesses, and residents opposed the facility; after review, DGS removed multi-agency fueling, reduced the program, added an esplanade, and limited new uses to seven years."
